

4th October 2021

TO WHOMSOEVER IT MAY CONCERN

CEAT Tyres Ltd. is India's leading tyre manufacturing company with over 50 years of presence and revenue of USD 1 billion. CEAT is leading tyres brand from India and provides world-class products and services across 100+ countries. It has wide range of portfolio of tyres for cars, bikes, trucks & buses and tractors. Vedant Chavan, a student of R.N. Podar School has worked with our R&D engineers to assist in research activities related to intelligent tyres project.

Vedant's passion for automobiles led him to approach us for working on research project for intelligent tyres. He undertook secondary research to map the offerings by Global and local tyre manufacturers to bring out different technologies to enable better functioning of an automobile. He analysed the competition portfolio and presented with his ideas to contribute to technology development process for CEAT smart tyres.

He worked with our team for 1 month (1st September 2021 to 30th September 2021) and came across as dedicated, enthusiastic learner. His grasping of new concepts, appreciation of IoT ecosystem and ability to understand impact of tyres usage in performance of an automobile is exceptional. During the project, Vedant analysed lot of information, organised it and presented in a concise & structured manner.

We firmly believe that Vedant's curiosity and zeal for learning new things will tremendously help him in his academic and professional endeavour.

For CEAT Limited

Alistair Azavedo
Sr. Manager - HR Technology & Services
