

To whom so ever it may concern

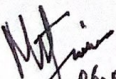

It is to certify that Vedant Chavan student of R.N. Podar School has interned with our R&D Centre at Mohali from 26th April'21 to 1st May'21. He was engaged in learning R&D centre activities and assisting members of testing and validation teams.

Our R&D Centre at Mohali is engaged in design and development of tractors and other agriculture mechanisation equipment which houses 100+ engineers and is equipped to state of the art facilities for design, development and validation activities.

Vedant is very proactive, enthusiastic and eager to learn new things. He was very curious to understand overall product development process and how engineers use their knowledge and learn new technologies while working on projects. He is a quick learner & understood the principles of design and various testing processes involved in validation of different aggregates of tractor. I was particularly impressed by his desire to get hands on experience by assisting the teams for testing and validation of clutch, brakes and transmission aggregate.

With his disciplined approach to learn and humble attitude, Vedant comes across as very good team player. I wish him all the success in his quest to gain engineering knowledge and all his future endeavours.

Best Regards,
